

AT&T Mi-Fi internet signup

AT&T Mi-Fi Device

As an alternative to our monthly Internet Reimbursement, for families who cannot obtain regular internet service or would like the flexibility offered by a mobile Wi-Fi device, CyberLynx offers an unlimited Mi-Fi service through AT&T. This is the same consumer Mi-Fi program AT&T offers, and the coverage area will mirror the AT&T wireless coverage area. The Mi-Fi subscription does not come out of the student's allotment, but **is a benefit over and above the allotment**. This service is provided by AT&T, but only CyberLynx can set up an account. CyberLynx pays AT&T directly for this service on behalf of the family. To participate, at least one child in the family must continue to be a full-time CyberLynx student. Internet service will be disconnected on the date of withdrawal from the CyberLynx program.

(Please select one device below)
