

AT&T Mi-Fi Device

As an alternative to our monthly Internet Reimbursement, for families who cannot obtain regular Internet service or would like the flexibility offered by a mobile Wi-Fi device, CyberLynx offers an unlimited Mi-Fi service through AT&T. This is the same consumer Mi-Fi program AT&T offers, and the coverage area will mirror the AT&T wireless coverage area. The Mi-Fi subscription does not count against the student's allotment; it **is a benefit over and above the allotment**. A one-time charge will be made to the allotment for the device. This service is provided by AT&T, but only CyberLynx can set up an account. CyberLynx pays AT&T directly for this service on behalf of the family. To participate, at least one child in the family must remain a full-time CyberLynx student. Internet service will be disconnected on the date of withdrawal from the CyberLynx program.

(Please select one device below.)

- o [\\$30 Franklin A70](#) (with a one-time charge of \$30 to the allotment)
- o [\\$350 Nighthawk M7 PRO](#) (with a one-time charge of \$350 to the allotment)
